

All About Me!

6

Welcome to your *final half term* at Giles Brook! During our **All about me** topic we will be learning about how to keep ourselves healthy both physically and emotionally.

Maths

This half term we will focus on embedding various concepts that we have learned across the year using projects. These will include:

- Fractions, decimals and percentages
- Algebra, ratio and proportion
- Measure, geometry and statistics

English

We will be writing information texts about the heart, but will also be reading scripts and practising our performing skills in preparation for our Year 6 production!

PE

PE with Nick remains on a Thursday and PE with the class teachers will be on Tuesdays. Please make sure trainers are always in school in case sessions are outside or change.

Homework

In order to prepare the children for homework at secondary school, you may find that homework tasks are smaller but more frequent. These may also be given on different days. Some will be set using Google Classroom while others may be on paper.

Science

This half term will have a Biology focus. You will be learning about:

- the various systems in the human body
- how the circulatory system works and its purpose
- the importance of nutrition for our bodies

PSHE & RSE

Along the way we will be studying the changes the human body goes through from now and throughout your teenage years. You will also be taught to recognise how diet, exercise, drugs and lifestyle affect the human body.

From an emotional point of view we will explore how to react in certain situations as well as coping with change, building confidence and recognising self-worth.

Geography

This half term's unit of geography has a focus on Globalisation. By the end we will know:

- what globalisation is
- the effect of economic globalisation
- the effect of political globalisation
- how globalisation has spread ideas across the world.
